

Product title: Helideck Emergency Response Team Member Further Training

Product code: 7541

Product type: OPITO Standard

Product category: Oil and Gas / Specialist Emergency Response / Helideck and Emergency Response

Teams

Date of last update: 19/07/2024 – Following the formal review of the OPITO Helideck Training and

Competence Formal Review 2023 the updated Product spec has been released with date of implementation 19/09/2024. Please refer to OPITO Helideck Training and Competence Formal Review outcomes document within the document tab in the

HUB for full details of changes.

Who is the Product for?

This Product is for currently-appointed OPITO-certified HERTMs that are required to revalidate their OPITO HERTM certification by refreshing and updating their knowledge and skills in aspects of their role that they cannot practice in the workplace.

Training and competence assessment of OPITO-approved Helideck Emergency Response Team Members (HERTMs) will comprise both onshore training and offshore workplace training and assessment. This Helideck Emergency Response Team Member (HERTM) Training Products form part of a wider industry Helideck Training and Competence Framework including helideck operations initial training, helideck emergency response team member and team leader initial/further training and associated helideck role workplace competence assessment standards. Further information on the wider industry Helideck Training and Competence Framework is depicted in the Helideck Training and Competence Framework - See supporting document

Appointment of HERTMs and HERTLs

The Installation, MODU or vessel Duty Holder is responsible for ensuring that personnel appointed to Helideck Emergency Response Team Member (HERTM) and Helideck Emergency Response Team Leader (HERTL) roles have received sufficient training and gained relevant experience to undertake the role(s) competently and safely.

The Duty Holder must ensure that, apart from the provision of onshore training:

- a) Workplace training is provided and workplace competence assessment is conducted,
 AND
- b) Additional Training e.g. Dangerous Goods by Air Awareness (DGbA), radio operator's certificate of competence (HERTL only), helicopter refueling (where required) additional helideck operations initial training (where they have been out of the role for 3 or more years) and meteorological/weather reporting training (where required by duty holder) is provided before the HERTL or HERTM is appointed to the role(s).

OPITO-certified HERTM Training

- (1) The HERTM Initial Training will be conducted at an onshore training centre
- (2) The HERTM Further Training this programme involves updating and refreshing relevant knowledge and undertaking practical emergency response training in the HERTM role not able to be conducted offshore.

What does this Product cover?

This Product aims to to give HERTM's the opportunity to practice and maintain the skills required when dealing with helicopter emergency response situations or incidents as members of an Offshore Helideck Emergency Response Team, in aspects of their role which they cannot reasonably practise offshore.

How can you successfully achieve this Product?

To achieve the Helideck Emergency Response Team Member Further Training the learner will need to complete the one mandatory unit.

What could this Product lead to?

Helideck Emergency Response Team Leader Initial Training

What are the entry requirements?

The prerequisites for the HERTM Further Training are:

a) A valid OPITO Helideck Emergency Response Team Member Training Certificate

OR

b) A valid OPITO HERTM Further Training Certificate.

Medical entry requirements

Training activities contained within this Product may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capable of participating fully.

Therefore, OPITO-approved training centres are required, as a minimum, to ensure that prior to participating in practical exercises the learner is declared fit, in that they

- a)Possess a valid, current offshore medical certificate or
- b)Possess an operator approved medical certificate,

And

c)Undergo medical screening by completing an appropriate medical screening form provided by the OPITO-approved Centre

The OPITO-approved Centre shall keep a record of the learners' declaration(s) of fitness in accordance with their document control policy(s) or procedures. This information, along with summary details of the type of physical activities the delegate/candidate will be asked to perform, will be given to learners by the OPITO approved Centre and, if applicable, to their sponsoring company as part of the joining instructions. The responsibility for declaring any current or pre-existing medical conditions that could have adverse effects to the individual's state of health while undertaking the training and/or assessment activities lies with the learner and/or company sponsoring the learner. Where doubt exists regarding the fitness of any learner, the OPITO-approved Centre must direct the individual to consult a medical officer familiar with the nature and extent of the training.

The details outlined are an overview of an OPITO Product, which is part of the OPITO Product Portfolio and is owned by the organisation These Products carry the OPITO logo.

Note: Practical exercises must be designed and delivered solely to meet this Product and must not place on the learners any demands other than those required to meet the Product.

Country Specific if applicable?

N/A

How is this Product assessed?

Learners will be assessed against the outcomes specified in accordance with the assessment guidance detailed in each unit.

Are there and ratios that must be adhered to for the delivery of this Product?

The minimum number of learners attending this programme is 4 and the maximum number is 12.

The following ratios specify the maximum number of learners that must be supervised by one instructor at any one time during each training event.

Theory 1:12

Demonstration 1:12

Practical Exercises 1:6

Note: For the HERTM, HERTM Further Training, HERTL and HERTL Further Training programmes, the maximum learner numbers and theory ratio may be exceeded to accommodate company/installation emergency response teams. However practical supervision ratios must not be exceeded.

What are the Guided Learning Hours?

12.5 hours Note: For the HERTM, HERTM Further Training, HERTL and HERTL Further Training programmes, the guided learning hours may differ to accommodate company/installation emergency response teams. However all other requirements of the Product must be met, unless stated otherwise.

What staff resources are required to deliver this Product?

Staff

Instructional staff must:

- (a) Fully understand the requirements of this industry standard.
- (b) Have been trained in training delivery and training assessment techniques.
- (c) Hold an industry-recognised assessor qualification.
- (d) Participate in an ongoing training and development programme which ensures that they are aware and knowledgeable of relevant industry requirements and changes to requirements.
- (e) Possess occupational experience in firefighting and practical knowledge of helicopter emergency response operations

The details outlined are an overview of an OPITO Product, which is part of the OPITO Product Portfolio and is owned by the organisation These Products carry the OPITO logo.

Please note, Products are subject to change in line with OPITO's policy of continual improvement.

Working together to develop a safe and skilled energy workforce

All staff will have the appropriate competencies to conduct or assist (as appropriate) with the element of training being undertaken.

OPITO Centres must have an auditable training programme in place to ensure instructors keep up-to-date with relevant current offshore practices and changes. The programme must include at least two of the following: visit(s) to offshore fixed or mobile installations, visit(s) to heliports, visit(s) to dry-docked rigs that have helidecks.

What facilities and equipment are required to deliver this Product?

Facilities

For details of facility and equipment, please refer to OPITO Standards Heli-training Facility and Equipment Specification Document

First Aid Facilities

Appropriate first aid facilities and equipment as specified in the training centre's risk assessments, and sufficient staff trained in the use of the facilities and equipment.

All facilities must be maintained and where appropriate, inspected and tested in accordance with current standards/legislation and manufacturers recommendations.

Risk assessments must be conducted and documented for all training facilities and equipment.

Equipment

Equipment used during practical exercises must be of a type in use regionally on offshore oil and gas installation/vessel helidecks.

For details of facility and equipment, please refer to OPITO Standards Heli-training Facility and Equipment Specification Document

All equipment must be maintained, and where appropriate, inspected and tested in accordance with current standards/legislation, guidance and manufacturers recommendations.

What is the validity of this Product?

2 years

Please note: If the expiry date on the learners previous certificate is within 90 days prior of the course enrolment date then the date of the new certificate should correspond with the expiry date of the existing/previous certificate unless stated otherwise by the Duty Holder or Asset Owner or Operator.

Product Summary

Product Structure:

The details outlined are an overview of an OPITO Product, which is part of the OPITO Product Portfolio and is owned by the organisation These Products carry the OPITO logo.

Please note, Products are subject to change in line with OPITO's policy of continual improvement.

Working together to develop a safe and skilled energy workforce

To achieve the Helideck Emergency Response Team Member Further Training the learner will need to complete the one mandatory unit.

Unit Code	Unit Title	
OIS-27	HERTM Further Training	

Unit Summary

Unit Code	OIS-27			
Title	HERTM Further Training			
Guided Learning Hours	12.5 hours			
Assessment Guidance	Assessment Guidance for Outcome 1			
	Centres must ensure that learners receive all theoretical learning specified in each Unit Outcome prior to any practical assessment taking place.			
	Centres must also be able to demonstrate that learners have achieved an understanding of the information and concepts detailed in each of the Unit Outcomes. This may be achieved through a variety of methods, including but not limited to: group or individual discussion, verbal or written questioning, scenarios, virtual simulation, and eLearning.			
	Assessment Guidance for Outcomes 2 - 4			
	Centres must ensure that learners receive all theoretical learning specified in each Outcome prior to any practical assessment taking place.			
	Following theoretical learning and demonstration of practical exercises by the centre, learners will be observed undertaking practical exercises covering all the criteria specified.			
	Learners must successfully complete all practical exercises in order to achieve this Unit.			
	Practical elements must be covered, using appropriate combinations of all of the following scenarios:			
	(a) Helicopter incident resulting in crash/overturned aircraft involving			
	fire/no fire			
	(b) Engine fire			
	(c) Fuel Spill during refuelling operations resulting in fire/no fire			
	(d) Emergency/precautionary landing			
	(e) Responding to Class A fires caused by helicopter incident			
	(f) Responding to *Class B fires (flammable liquid spill and leaking fuel fires)			
	caused by helicopter Incident			
	(g) Rescue from an overturned aircraft			
	(h) Internal fire fighting			
	(i) Responding to a helicopter incident off the helideck			
	(j) Loss of fire main/pressure			

The details outlined are an overview of an OPITO Product, which is part of the OPITO Product Portfolio and is owned by the organisation These Products carry the OPITO logo.

	Note:*Class B fires: For environmental purposes, smoke suppression or clean-burn systems are acceptable for reducing smoke during Class B fire exercises
	All learners to practice in the role of the Helideck Emergency Response Team Member (HERTM) during emergency response exercises.
	Centres must provide a role-playing Helideck Emergency Response Team Leader during these exercises (this could be one of the instructors)
Assessment/Evidence Requirements	Records of assessment referencing all outcomes, must be securely maintained.

OUTCOMES		CRITERIA	
		1.1	Key parts of relevant helideck operations regulations and guidelines
		1.2	The principles of helicopter emergency response including:
			1.2.1 helideck ER team priorities during an emergency
			1.2.2 firefighting systems; fixed and mobile
1 h	Outcome: Relevant aspects of elideck operations and helicopter mergency response		1.2.3 review requirements for pre-use checks, donning, using and control monitoring air consumption of breathing apparatus
Т	he learner will understand:		1.2.4 search and rescue on the helideck and inside the helicopter
			1.2.5 casualty management
			1.2.6 Human Factors during emergency response including stress affecting decision making, physical limitations and sources of assistance available during emergency events
			1.2.7 awareness and understanding of back up crew during protracted incident
2 er	Outcome: Carry out effective mergency response to incidents on r around a Helideck he learner will perform:	2.1	Emergency access and egress to and from helidecks including clear, concise and effective communications with HERTL and team members

The details outlined are an overview of an OPITO Product, which is part of the OPITO Product Portfolio and is owned by the organisation These Products carry the OPITO logo.

		Undete UEDTI on process a reject
	2.2	Update HERTL on progress against the emergency response plan at appropriate times
	2.3	Respond appropriately to HERTL direction during emergencies including the correct selection of appropriate fire-fighting equipment for the incident
	2.4	Under direction from the HERTL: approach the incident area in a controlled manner – continually assessing how the changes in the emergency could impact on the safety of other ERT members, maintaining a means of escape from the incident area
	2.5	Effective execution of emergency response tasks
	2.6	Work with back-up emergency response teams – where required to do so
	2.7	Appropriate response to non- firefighting operations during helicopter incident
	3.1	Conduct helicopter incident firefighting operations, to include responding to a helicopter engine fire using a CO2 media extended applicator
Outcome: Use firefighting equipment correctly	3.2	Correct donning, using and control monitoring air consumption of breathing apparatus (BA) when instructed by HERTL (all learners to practice correct donning, using and control monitoring air consumption of the BA)
The learner will perform:	3.3	Effective use of firefighting fixed, portable and mobile systems, including fixed fire monitors, dry chemical and CO2 fire extinguishment and control media
	3.4	Hose-running techniques and associated hazards
	3.5	Respond to an NUI helideck fire (with limited firefighting equipment)

The details outlined are an overview of an OPITO Product, which is part of the OPITO Product Portfolio and is owned by the organisation These Products carry the OPITO logo.

Outcome: Execute search and rescue activities

The learner will perform:

- extracting and handling missing personnel and casualties (SAR)
- 4.2 Correct casualty handling techniques

helicopter incident on the helideck

ABOUT OPITO

OPITO is the global, not-for-profit, skills body for the energy industry. For over three decades the company has ensured safety is at the forefront of operations, with more than 375,000 people trained every year.
